SAFETY

Safety in the workplace can refer to both physical and psychological safety. In both instances, it means having a workplace that's reasonably free from danger to all employees and actively preventing the workplace from becoming unsafe.

Workplace safety is very important for each and every employee in the industry because all the workers desire to work in a safe and protected atmosphere. Health and safety is the key factor for all the industries in order to promote the wellness of both employees and employers. It is a duty and moral responsibility of the company to look after the employee's protection.
